

PURCHASE SOFTWARE or SaaS

RENT

- **No IT effort**
The systems will be operated on our servers and we take care of installing updates, backups and the operation of your software. Your IT department has no effort.
- **Short duration and low investment risk**
You choose the period over which you want to rent the system. The shortest runtime is 3 months and after the expiration of your contract you can either extend or terminate comfortable. Even if you do no longer need a particular module only, can disable it. Likewise you are able to book new modules anytime.
- **Total price for updates & support**
You have full control of costs and there are no hidden extras. All updates and support are included in the lease. You can always capture the exact cost and incorporate into your budget planning.

BUY

- **Lower overall costs for long-term use**
When you purchase the software, you pay a one-time purchase price. There are no monthly or annual costs. You decide whether you want to conclude a support contract and a update contract. If you do not, you save costs, but also have a higher intrinsic effort. Compared to rent are the total cost for long-term use less.
- **Data sovereignty**
You manage your data completely on their own servers and integrate the system into your existing backup and data protection plan. You control yourself if the system is also accessible via the Internet or only from the internal network.
For maintenance purposes you give remote access by arrangement.
- **Full independence**
In the event of insolvency or discontinuance of our products you are not affected. The system operates completely independently of us.
